**Village of Mamaroneck,
New York Zoning Board of Appeals (Effective 2007)**

11. A use variance may only be granted if it is determined that zonings regulations and restrictions cause the property owner unnecessary hardship. New York law provides that: "In order to prove such unnecessary hardship, the property owner shall demonstrate to the Board of Appeals that:

- 1) Under the applicable zoning regulations, the owner is deprived of a reasonable return for each and every permitted use under the zoning regulations for the particular district where the property is located This deprivation must be established by competent financial evidence;
- 2) the alleged hardship relating to the property in question is unique, and does not apply to a substantial portion of the district or neighborhood;
- 3) the requested use variance, if granted, will not alter the essential character of the neighborhood; and
- 4) the alleged hardship has not been self-created

You must set forth the facts which support your Application request. (Attach additional sheets, schedules, or other information that you want the Board to consider):

Village of Mamaroneck,

New York Zoning Board of Appeals (Effective 2007)

12. Under State law, the Board of Appeals must consider the following factors in making a decision on your request for an area variance:

- 1) whether an undesirable change will be produced in the character of the neighborhood or a detriment to nearby properties will be created by the granting of the area variance;

An undesirable change will not be a result of this variance if granted. The proposed addition is within scale and size of other houses in the area and the proposed improvements will upgrade the exterior appearance. The addition proposed is atop an existing 1st Floor so no evacuation or additional drainage is required.

- 2) whether the benefit sought by the applicant can be achieved by some method feasible for the applicant to pursue other than an area variance;

No alternative solution is possible for this proposed addition. This proposed location is 1 story. It will align with the existing dwelling and not further the degree of non conformity in a horizontal fashion.

- 3) whether the requested area variance is substantial;

The side yard variance of .2' is minimal. The variance for FAR is not substantial and is in context with the neighborhood. The variance for an addition to an existing non conforming use has no physical bearing and is administrative in nature. These variances are required due to an existing non conforming condition.

- 4) whether the proposed variance will have an adverse effect or impact on the physical or environmental conditions in the neighborhood or district; and

The proposed variance and addition will not result in any adverse environmental condition. The height is within zoning and no additional storm water run off will be created. The addition is within the footprint of the house.

- 5) whether the alleged difficulty was self-created...

The alleged difficulty is not self created but a result of the existing conditions. The request to construct may be self created but the approved lot and existing house are the reason the variance is required.

13. If this Application is not for an area or use variance, provide information that supports your Application. You must refer to the appropriate sections of the Village Code and to other legal requirements necessary for the board to consider your application

(Article X Special Permit) § 342-71 Action on referral.

A. That the location and size of the use, the nature and intensity of the operations and traffic involved in or conducted in connection with it, the size of the site in relation to it and the location of the site with respect to the type, arrangement and capacity of streets giving access to it and the hours of operation are such that the proposed use will be in harmony with the appropriate and orderly development of the district in which it is located.

B. That the location, nature and height of buildings, walls and fences and the nature and extent of the landscaping and screening on the site, as existing or proposed, are such that the use will not hinder or discourage the appropriate development and use of adjacent land and buildings.

C. That operations in connection with the proposed use will not be objectionable by reason of noise, fumes, smoke, dust, vibration, glare, intensity or flashing of lights.

D. That the parking areas to be provided will be of adequate capacity for the particular use, properly located and suitably screened from adjoining residential uses and that the entrance and exit drives shall be laid out so as to achieve maximum safety.

E. That, where they are applicable, the standards and requirements established or approved by the Village Engineer have been satisfactorily met as evidenced by his certification and that all necessary approvals of any other governmental agency or board have been or will be obtained by the applicant.
