Please provide information that supports your Application. You must refer to the appropriate sections of the Village Code and to other legal requirements necessary for the board to consider your application

(Article X Special Permit) § 342-71 Action on referral. *Please see attached narrative

A. That the location and size of the use, the nature and intensity of the operations and traffic involved in or conducted in connection with it, the size of the site in relation to it and the location of the site with respect to the type, arrangement and capacity of streets giving access to it and the hours of operation are such that the proposed use will be in harmony with the appropriate and orderly development of the district in which it is located.

The proposed development is classified in a C-2 (General Commercial) zoning district within the Village which residential uses are permitted subject to the issuance of a Special Permit. See Zoning Code Section 342.50. The proposed development will replace two single-family residential units, and will be next to another multi-family unit. Thus, the proposed development and its location are in harmony with the development of the C-2 district.

B. That the location, nature and height of buildings, walls and fences and the nature and extent of the landscaping and screening on the site, as existing or proposed, are such that the use will not hinder or discourage the appropriate development and use of adjacent land and buildings.

The proposed development will not discourage adjacent development as the properties adjacent to the proposed development are already improved. The landscaping of the proposed development will be similar to what can be found on the surrounding properties.

C. That operations in connection with the proposed use will not be objectionable by reason of noise, fumes, smoke, dust, vibration, glare, intensity or flashing of lights.

The operations of the proposed development will not generate fumes, smoke, dust, vibration, or flashing lights.

D. That the parking areas to be provided will be of adequate capacity for the particular use, properly located and suitably screened from adjoining residential uses and that the entrance and exit drives shall be laid out so as to achieve maximum safety.

The proposed development will provide ample parking for its use and will be enclosed within the first floor garage, not visible from the road.

E. That, where they are applicable, the standards and requirements established or approved by the Village Engineer have been satisfactorily met as evidenced by his certification and that all necessary approvals of any other governmental agency or board have been or will be obtained by the applicant.

The applicant is working towards securing the necessary permits which include a Building Permit, Site Plan Application, Special Permit, and HCZMC Consistency Review.
