

CAP Cohort Kick-Off Meeting

Government Operations Climate Action Plan

Melanie Patapis, CSC Coordinator

**Climate Smart
Communities**

Hudson Valley Regional Council

Meeting Overview

- **Why this action is important**
- **Requirements for government operations CAPs**
- **Pathways to creating a CAP**
- **Resources**
- **Next steps**

**Climate Smart
Communities**

Hudson Valley Regional Council

Requirements for Government Operations Climate Action Plan

- Results of the government operations GHG inventory
- Set of prioritized initiatives for reducing GHG emissions from government operations
- At least one GHG reduction target specific to the local government
- Documentation that the final CAP was officially adopted by the local government and released to the public
- Public outreach: Provide an opportunity for the public to review and comment on the draft climate action plan

Communities**

Hudson Valley Regional Council

Pathways to Creating a GOCAP

1. CSC Task Force meets on each and creates the draft for each sector, communicates with department heads, holds final meeting with head staff to finalize the plan
2. CSC Task Force meets to make draft and holds one big meeting: department heads participate for their section, last part of the meeting finalizes the plan
3. Ad-hoc, no formalized meeting structure, better for small municipalities with very good political relationships with elected officials and staff
