

COASTAL ASSESSMENT FORM

I. Instructions

A. In accordance with Chapter 240 of the Village Code, proposed actions are to be reviewed to determine their consistency with the policies of the Village of Mamaroneck Local Waterfront Revitalization Program. This Coastal Assessment form is intended as an aid to that review.

B. As early as possible in an agency's formulation of a direct action or as soon as an agency receives an application for approval of an action, the agency shall do the following:

1. For direct agency actions, the agency shall complete this Coastal Assessment Form. This CAF shall be completed prior to the agency's determination of environmental significance under SEQRA.
2. Where applicants are applying for approvals, the agency shall cause the applicant to complete this Coastal Assessment Form, which shall be completed and filed together with the applications for approval and Environmental Assessment Form.
3. Unless the application is being undertaken, funded or approved by the Board of Trustees or is otherwise exempted under Chapter 240 of the Village Code, CAFs shall be forwarded to the Harbor Coastal Zone Management Commission for a determination of consistency. Where the action is being undertaken, funded or approved by the Board of Trustees, the Harbor Coastal Zone Management Commission shall be provided with a copy of the CAF for purposes of making a written recommendation on consistency to be forwarded to the Board of Trustees to assist that Board in determining consistency of the application. If an action cannot be certified as consistent to the maximum extent practicable with the coastal policies, it shall not be undertaken.

C. Before answering the questions in Section II, the preparer of this form should review the coastal policies contained in the LWRP. A proposed action should be evaluated as to its significant beneficial and adverse effects upon the coastal area.

II: COASTAL ASSESSMENT:

A.2. (11,12,17) The majority of the proposed work is located offshore from the applicant's upland property, and poses no hazard to life or property. The work will not adversely alter the coastal features in the vicinity. No alteration in existing natural features will occur that might increase the potential for damage due to flooding. The proposed landing replaces a like section of the existing seawall, which has withstood normal flooding for several decades.

A.3. (44) The proposed work will provide the applicant with access to recreational use of tidal waters adjacent to her property while avoiding the repeated crossing of the intertidal zone. No tidal wetland vegetation is located at the site, as the intertidal region is submerged at most times during the tidal cycle. The floating dock and the vessel berthed there will not sit on the bottom at times of normal low tides.

C.1. (2, 4, 6, 19, 20, 21, 22) The proposed work will support a water-dependent use of the site. The existing developed shorefront (seawall at and adjacent to the site) precludes a non-structural means of accessing the adjacent waterway. The proposed work will not adversely impact the public's use of the waterway.
