Subject: Monday May 8, Work Session

All,

I have two items for Work Session

Flood Mitigation options both long and short term: Short term: River Gages/Gauges, which were dropped from the revised adopted ARPA spending plan (City of Rye is installing, we should explore working in tandem with Rye, Harrison and White Plains). Longer term: reinvigorating the revision of our storm water management laws mindful of equitable outcomes, the exploration of identification of a "buy out" strategy using federal funding to purchase repetitive flood prone parcels which will help alleviate flooding overall.

Second: **Establishment of an Affordable Housing Task Force** to explore and recommend strategies that will increase the availability of housing options in the Village of Mamaroneck as well as educate us and the community about both the need for affordable housing in our community, what the term affordable housing really means and encompasses and why village residents should care about affordable housing.

Thank You,

Nora
