Good morning, Jerry.

We in the parks department are running into an issue with our ball field machine. As you know parks deals with maintenance of all harbor island softball and baseball fields(4). Our current machine was bought in 2008 and has over 20,000 hours on the meter. We are running into mechanical problems and are keeping it up and running as best we can. The issue we are now running into is availability of parts. Our parks mechanic can keep it alive for now but without being able to secure the proper parts and the use it gets ( 7 days a week, approximately 48 hours a week) I am afraid of a total breakdown and seeing that this is a special piece of equipment it is not readily available for rental if it was to totally breakdown. If the ball field machine comes out of service that would cause us to cancel little league baseball, little league softball, and VOM softball. I have a replacement on the parks capital for 2025 but I do not believe our current machine will last that long. It is with hope that we can secure the new ball field groomer and keep the old one as a backup/ spare, so we are not in any danger of canceling games/ leagues due to not having the proper equipment.

Please see included quote for new ball field groomer totaling \$45,051.58. There are unused funds in committed fund balance equaling \$10,000 that we would be able to use towards the new ball field machine. We would only need to request \$35,051.58 to purchase new ball field groomer and have old machine as spare.
